

The ,Multitool' for troubleshooting and commissioning. *CodeWrights PACTware Bundle*

CodeWrights *PACTware Bundle* is the free of charge, complete FDT solution package for device management.

Visit the all new CodeWrights device integration community website www.devicepackage.com and sign up today. Learn, find solutions, download free software, shop and discuss.

The *PACTware Bundle* is the solution for your existing FDT2 and FDT1.2 DTMs. The *CodeWrights PACTware* is an FDT2 based frame application with backward compatibility to FDT1.2. With the included *iDTM-FDI (Base)*, the FDI Adapter for every FDT frame application, PACTware will be FDI enabled. And finally the all new *HART CommDTM (FDT2)* will provide connectivity to your HART devices.
